Jorge González Azpillaga

Senior Front-End & AI Engineer

Valencia · contact@jgonaz.dev · jgonaz.dev · linkedin.com/in/jgonaz · github.com/Jgonaz

PROFILE

Front-end developer with over 9 years of experience building large-scale web products, specialised in Vue and TypeScript with a clear focus on UX and product. At El Corte Inglés I have designed and evolved the agentic harness the development team uses every day, and I have shipped my own products to production, built entirely with AI agents.

SKILLS

Agentic engineering	Agent and subagent orchestration, skills, MCP, context window management, token optimisation, SDD, human approval
AI tools	GitHub Copilot CLI, Claude Code, Codex CLI, Gemini CLI, OpenCode, Cursor · LLM APIs, Ollama
Front-End	Vue 3, Nuxt, React, Next.js, TypeScript, Vite, Pinia, Tailwind, Sass · SSR and accessibility
Back-End	Node.js, Express, REST APIs · PostgreSQL, MySQL, MongoDB, Supabase, Neon · C#/.NET MVC
Testing and deployment	Vitest, Jest, Playwright · Vercel, Azure, AWS Amplify, Docker · Git, pnpm
UI / UX	Figma, Claude Design, Google Stitch

EXPERIENCE

El Corte Inglés · Senior Front-End Developer at Hiberus #h

2024 – Present · Valencia

Front-end · Team agentic harness

Vue 3, TypeScript, Node.js, Express, Vite, SSR · GitHub Copilot CLI, MCP, SDD

- Development of features in the My Account area of one of the largest ecommerce sites in Spain, with SSR and accessibility.
- Design and evolution of the team's agentic harness: an orchestrator with specialised subagents and skills in GitHub Copilot CLI, running on OpenAI and Anthropic models.
- Automation of the cycle from user story to PR: discovery, plan or specs, implementation, validation, browser testing and review, with human approval.
- Optimisation of token spend: model and effort per subagent, and context loaded on demand.

Nyxell App · Senior Front-End Developer

2022 – 2023 · Zaragoza

Vue 2/3, Sass, Node.js, Vite, AWS Amplify

- Led the back-office of a nightlife ticket marketplace (events, venues and customers), including the migration from Vue 2 to Vue 3.
- Improved the product's interface and usability.

Grupo Barrabés · Agile Front-End Developer at Trackglobe

2019 – 2022 · Zaragoza

Vue 2, Sass, C#, .NET MVC, Azure

- Development and maintenance of custom modules with Vue and Sass on a .NET MVC platform, and integration of HTML5, Sass and JavaScript mockups.

EFOR · .NET FullStack Developer at Integra Tecnología

2017 – 2019 · Zaragoza

C#, .NET MVC, MySQL, JavaScript

- Custom software development, including the design and maintenance of database schemas, and research into Microsoft mobile solutions in Office 365 (PowerApps).

Hipercor (Grupo El Corte Inglés) · Intern Technician

2013 – 2014 · Seville

- Hardware assembly and maintenance, backups and technical support.

PROJECTS

Fitnessia · fitnessia.jgonaz.dev

PWA for planning and logging workouts, with offline logging. Designed and shipped to production by me, built entirely with AI agents.

Nuxt 4, Vue 3, TypeScript, Neon, Drizzle

Balanz.io · balanz-io.jgonaz.dev

Shared household finances, with AI that suggests categories and logs expenses by voice or photo. Built entirely with AI agents.

Nuxt 4, Vue 3, Supabase, Gemini API

Personal harness (jdev-ai) · github.com/Jgonaz/jdev-ai

Open-source harness for working with several agents (Claude Code, Codex, Copilot, OpenCode) on independent projects: subagents, per-project memory and history, worktrees and specs.

EDUCATION

Higher Vocational Diploma in Cross-Platform Application Development · IES Santiago Hernández (Zaragoza) 2015 – 2017

Intermediate Vocational Diploma in Microcomputer Systems and Networks · IES Martínez Montañés (Seville) 2012 – 2014

LANGUAGES

Spanish native · **English** B2 (certification in progress), strong written level and broad technical vocabulary.
